- 05 Who is Akmersan?
- 06 Chronology

Confidently since 1998

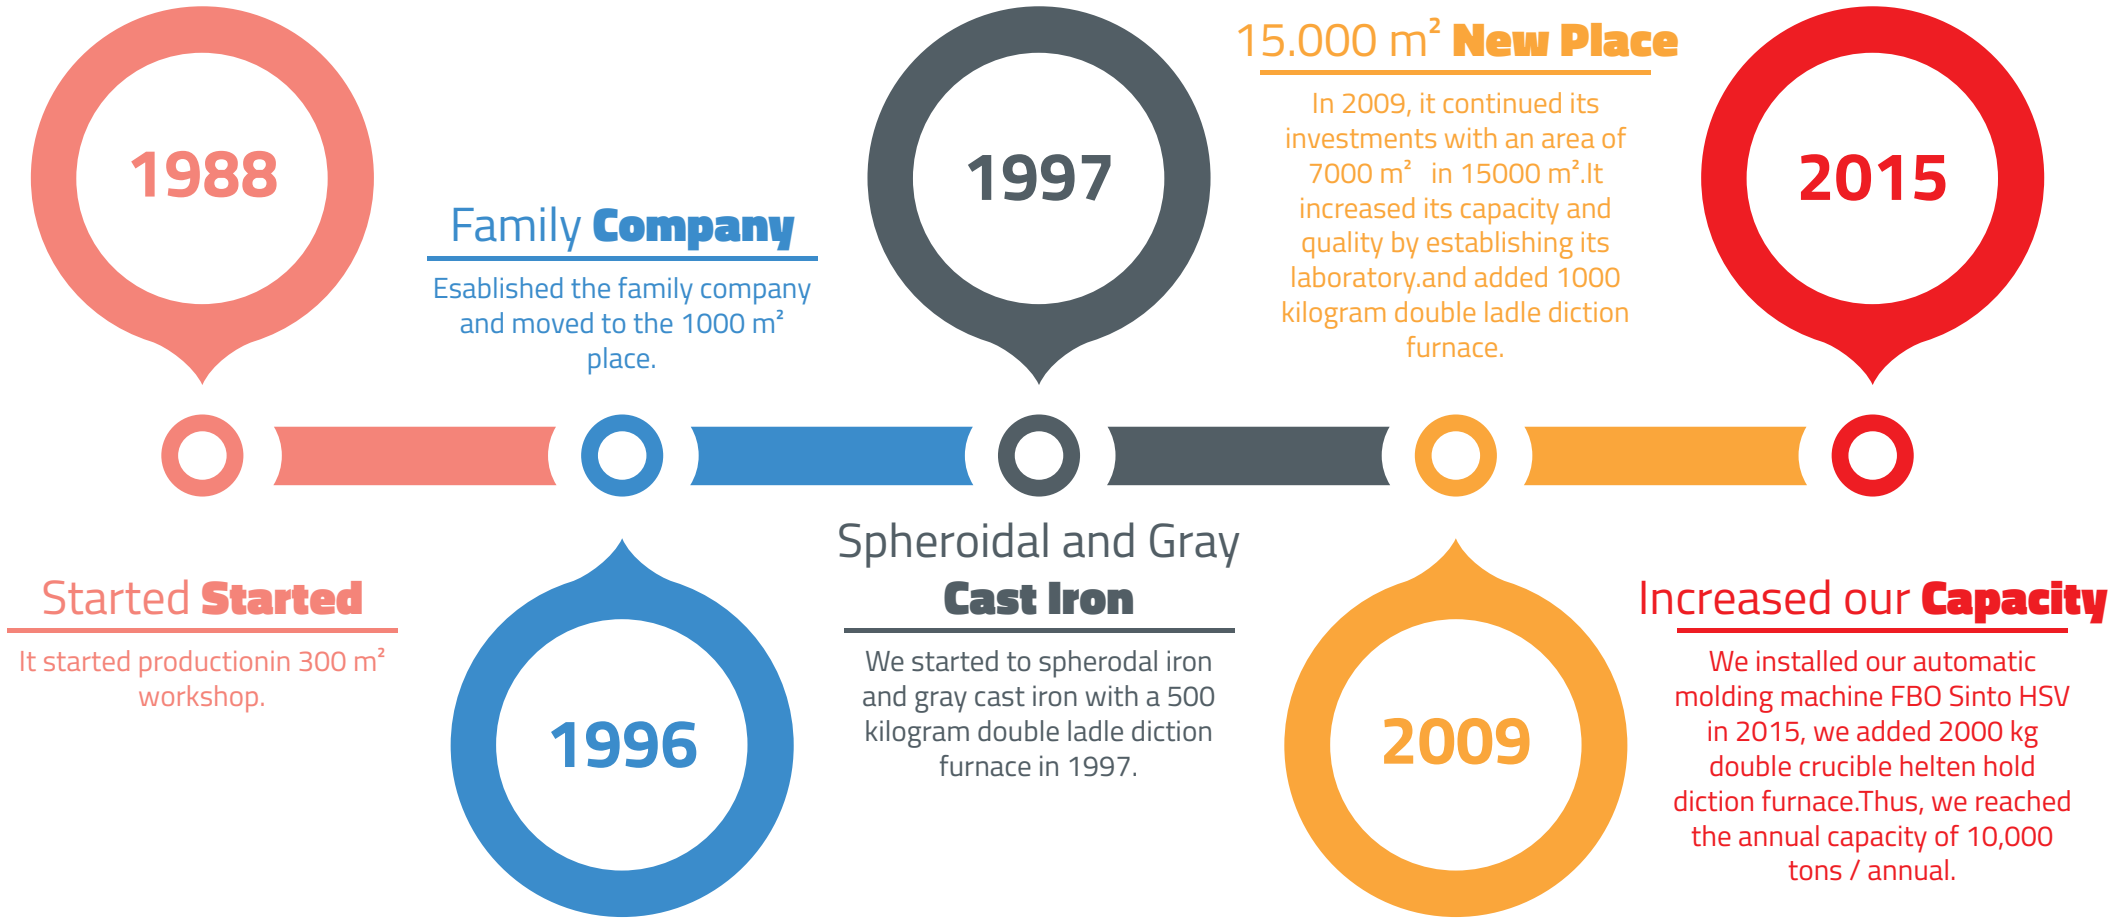

Our factory started production in 1998 at a 300m² workshop. In 1996, we established a family company and moved to our new building of 1000 m². We started to, spheroidal iron and gray cast iron with a 500 kilogram double ladle diction furnace in 1997.

By prioritizing customer satisfaction with the knowledge and experience gained here. It continued its investments of 7000 m² closed area in 15000 m² in 2009.

It increased its capacity and quality by establishing its laboratory and added 1000 kilogram double ladle diction furnace. We installed our automatic molding machine FBO Sinto HSV and we added 2000 kg double crucible helten hold diction furnace in 2015. Thus, we reached the annual capacity of 10,000 tons / annual.

About Production

In this Chart

11	Machine Park
12	Production Capability
16	Semi Products
18	Our Certificates
20	Laboratory

Machine Park

- FBO 4-Sinto HVS-Moulding machine
- Fully automatic wet sand plant
- 2 tons double ladle induction furnace
- 1 tons double ladle induction furnace
- 2 pieces Suspended dust shot machine
- Sand annealing heat treatment machine
- 10 ton in one go .
- 2 pieces ladle
- 3 pieces forklift

Production

- 7000 m² closed and in 15.000 m² area
- 2000 kg double crucible helten hold diction furnace.
- Annual 10.000 ton capacity
- Casting from 10 kilogram piece to 2000 kilogram piece
- Automotiv spare parts
- Agricultural spare parts
- Machine parts
